FINAL ACCOUNTS

The transactions of a business enterprise for the accounting period are first recorded in the books of original entry, then posted there from into the ledger and lastly tested as to their arithmetical accuracy with the help of trial balance. After the preparation of the trial balance, every businessman is interested in knowing about two more facts. They are: (i) Whether he has earned a profit or suffered a loss during the period covered by the trial balance, and (ii) Where does he stand now? In other words, what is his financial position?

For the above said purposes, the businessman prepares financial accounts for his business i.e. he prepares the Trading and Profit and Loss Account and Balance Sheet at the end of the accounting period. Thus it involves preparation of income statement and financial statement and are popularly known as final accounts. The preparation of financial statements depends upon whether the business concern is a trading concern or manufacturing concern. If the business concern is a trading concern, it has to prepare the following accounts along with the Balance Sheet: (i) Trading Account; and (ii) Profit and Loss Account.

But, if the business concern is a manufacturing concern, it has to prepare the following accounts along with the Balance Sheet: (i) Manufacturing Account; (ii) Trading Account; and (iii) Profit and Loss Account.

Trading Account is prepared to know the Gross Profit or Gross Loss. Profit and Loss Account discloses net profit or net loss of the business. Balance sheet shows the financial position of the business as on a given date. For preparing final accounts, certain accounts representing incomes or expenses are closed either by transferring to Trading Account or Profit and Loss Account. Any account, which cannot find a place in any of these two accounts goes to the Balance Sheet.

TRADING ACCOUNT

After the preparation of trial balance, the next step is to prepare Trading Account. Trading Account is one of the income statements, which shows the result of buying and selling of goods and/or services during an accounting period. The main objective of preparing the Trading Account is to ascertain gross profit or gross loss during the accounting period. Gross Profit is said to have made when the sale proceeds exceed the cost of goods sold. Conversely, when

sale proceeds are less than the cost of goods sold, gross loss is incurred. For the purpose of calculating cost of goods sold, we have taken into consideration opening stock, purchases, direct expenses on purchasing or manufacturing the goods and closing stock. The balance of this account i.e. gross profit or gross loss is transferred to the Profit and Loss Account. The specimen of a Trading Account is given below:

| a server of the server server server server | the surger of the | on 31st December |
|---|----------------------|---|
| To Opening Stock | Rs | Rs |
| To Purchases less Returns | A maber Trade | By Sales less Returns |

| To Profit and Loss A/c | nice and solar in | range abrails he deducted in the inner column and |
| (Gross Profit transferred) | - | reserve and credited to Tradit P Account. |

MANUFACTURING ACCOUNT

The concern which are engaged in the conversion of raw materials into finished goods, are interested to knowing the cost of production of the goods produced. The cost of the goods produced cannot be obtained from the Trading Account. So, it is desirable to prepare a Manufacturing Account prior to be preparation of the Trading account with the objective of ascertaining the cost of goods produced during the accounting period.

The proforma of Manufacturing Account is given as under:

MANUFACTURING ACCOUNT

PROFIT AND LOSS ACCOUNT

Trading Account results in the gross profit/ gross loss made by a businessman on purchasing and selling of goods. It does not take into consideration the other operating expenses incurred by him during the course of running the business. Besides this, a businessman may have other sources of income. In order to ascertain the true profit or loss, which the business has made during a particular period, it is necessary that all such expenses and incomes should be considered. Profit and Loss Account considers all such expenses and incomes and gives the net profit made or net loss suffered by a business during a particular period. All the indirect revenue expenses and losses are shown on the debit side of the Profit and Loss Account, where as all indirect revenue incomes are shown on the credit side of the Profit and Loss Account.

Profit and Loss Account measures net income by matching revenues and expenses according to the accounting principles. Net income is the difference between total revenues and total expenses. In this connection, we must remember that all the expenses, for the period are to be debited to this account whether paid or not. If it is paid in advance or outstanding, proper adjustments are to be made. Likewise all revenues, whether received or not are to be credited. Revenue if received in advance or accrued but not received, proper adjustment is required.

A proforma of the Profit and Loss Account showing probable items therein is as follows:

BALANCE SHEET

A Balance Sheet is a statement of financial position of a business concern at a given date. It is called a Balance Sheet because it is a sheet of balances of those ledger accounts, which have not been closed till the preparation of Trading and Profit and Loss Account. After the preparation of Trading and Profit and Loss Account the balances left in the trial balance represent either personal or real accounts. In other words, they either represent assets or liabilities existing on a

particular date. Excess of assets over liabilities represent the capital and is indicative of the financial soundness of a company.

A Balance Sheet is also described as a Statement showing the Sources and Application of Capital. It is a statement and not an account and prepared from real and personal accounts. The left hand side of the Balance Sheet may be viewed as description of the sources from which the business has obtained the capital with which it currently operates and the right hand side as a description of the form in which that capital is invested on a specified date.

Characteristics

The characteristics of a Balance Sheet are summarized as under:

(a) A Balance Sheet is only a statement and not an account. It has no debit side or credit side. The headings of the two sides are Assets and Liabilities.

(b) A Balance Sheet is prepared at a particular point of time and not for a particular period. The information contained in the Balance Sheet is true only at that particular point of time at which it is prepared.

(c) A Balance Sheet is a summary of balances of those ledger accounts, which have not been closed by transfer to Trading and Profit and Loss Account.

(d) A Balance Sheet shows the nature and value of assets and the nature and the amount of liabilities at a given date.

| Liabilities | Rs | Assets | Rs |
|----------------------------|-----------------|-----------------------|----------------|
| Current Liabilities | | Current Assets: | TRACE PROPERTY |
| Bank Overdraft | xxx | Cash-in-hand | XXX |
| Bills Payable | xxx | Cash at bank | XXX |
| Outstanding Expenses | XXX | Bills Receivable | XXX |
| Sundry Creditors | xxx | Sundry Debtors | xx |
| Income received-in-advance | xxx | Prepaid Expenses | xx |
| | | Accrued income | xx |
| Long-term Liabilities: | 1.1.1 Balan | Closing Stock | xx |
| Loan | xxx | Investments: | |
| Capital: | | Fixed Assets: | |
| Opening balance xxx | F. 4. 4. 5 T. 6 | Furniture and Fixture | xx |
| Add: Net Profit | | Plant and Machinery | xx |
| (Less: Net Loss) xxx | | Building | xx |
| XXX | | Land | xx |
| Less: Drawing xxx | xxx | Goodwill | xx |
| | XXX | | XXX |

Adjustment entries:

- 1. **Closing stock:** On the credit side of the trading account and on the asset side of the balance sheet.
- 2. **Outstanding expenses:** Add to the respective expense account on the Dr side of the trading or P&L account and show as a liability in the balance sheet.
- 3. **Prepaid expenses:** Deduct from the respective expense account on the Dr side of the trading or P&L account and show as an asset in the balance sheet.
- 4. **Accrued income:** Add to the respective income account on the Cr side of the trading or P&L account and show as an asset in the balance sheet.
- 5. **Income received in advance:** Deduct from the respective income account on the Cr side of the trading or P&L account and show as a liability in the balance sheet.
- 6. **Depreciation:** On the debit side of P&L account and deduct from the respective asset on the asset side of balance sheet.
- 7. Bad debts:

If it is inside trial balance then it is to be shown on the Dr side of P&L account and no other treatment is given.

However if it is outside trial balance, then it is shown on the Dr side of P&L account and also deducted from debtors on the asset side of balance sheet.

- 8. **Provision for bad debts:** On the debit side of P&L account and deducted from debtors on the asset side of balance sheet.
- 9. **Interest on capital:** On the debit side of P&L account and added to capital on the liability side of balance sheet.
- 10. **Interest on drawings:** On the credit side of P&L account and deducted from capital on the liability side of balance sheet.
- 11. **Goods for domestic use:** Deduct from purchases on the debit side of trading account and deduct from capital on the liability side of balance sheet.

12. **Goods as free samples:** Deduct from purchases on the debit side of trading account and also show it as an expense on the debit side of P&L account.

13.Accidental loss of goods:

- Not insured: Show it on the credit side of trading account and as a loss on the debit side of P&L account.
- **Fully insured:** Show it on the credit side of trading account and as an insurance claim on the asset side of balance sheet.
- **Partly insured:** Show it on the credit side of trading account and the part, which is not insured is shown as a loss on the debit side of P&L account while as the part which is insured is shown as an insurance claim on the asset side of balance sheet.

Prepare Trading and Profit and Loss Account for the year ending on 31st March 20X2 and a Balance Sheet as on that date after considering the following matters:

- (a) Depreciate Land and Building at 5% p.a. and Motor Vehicles at 15% p.a.
- (b) Goods costing Rs 600 were sent to a customer on sale or return for Rs 700 on 30th March 20X2 and has been recorded in the books as actual sales.
- (c) Salaries amounting to Rs 700 and Rates amounting to Rs 400 are due.
- (d) A fire broke out on 1 April 20X2 destroying goods worth Rs 200.
- (e) The Provision for Doubtful Debts is to be brought up to 5% on Sundry debtors.
- (f) Stock in hand on 31st March 20X2 was valued at Rs 6,250.
- (g) Goods costing Rs 500 were taken away by the proprietor for his personal use, no entry has been made in the books of accounts.
- (h) Prepaid insurance amounted to Rs 175.
- (i) Provide for manager's commission at 5% on net profit after charging such Commission.

ERRORS AND ITS RECTIFICATION

Every concern is interested in ascertaining its true profit/loss and financial position at the close of the trading year. The effort of the accountant is to prepare the final accounts in such a fashion, which exhibits true picture of the business. The basic information for the preparation of final accounts is supplied by the trial balance. Thus, the accuracy of the trial balance determines to a great extent

the accuracy or otherwise of the information provided by final accounts. However, the trial balance is prepared to ensure the arithmetical accuracy of the records of a business and also to ensure that for every debit entry a credit of an equal amount has been recorded. Thus, a trial balance in which the total of the debits does not equal the total of credits can be taken as an evidence for the existence of some errors in the records. On the other hand, a trial balance in which the total of the debits equal the total of credits is not a conclusive proof of accuracy of the records. Certain errors may not affect the agreement of a trial balance as the erroneous entries may not violate the dual aspect concept. It means that even if the trial balance agrees, steps should be taken to ensure that the records are free from errors. It, therefore, becomes utmost important to locate such errors and rectify them so that the correct financial position of the concern may be ascertained. So whenever errors in accounting records come to notice, they should be rectified without waiting till the end of the accounting year when trial balance is to be prepared. The objectives of rectification of errors are as follows:

- a) Presenting correct accounting records;
- b) Ascertaining correct profit or loss for the accounting period;
- c) Exhibiting a true financial position of the concern on particular date.

CLASSIFICATION OF ERRORS

The errors can be classified as follows:

- \cdot Clerical Errors
- · Errors of Principle

Clerical errors

Clerical errors are those errors, which are committed by the clerical staff during the course of recording the business transactions in the books of accounts. These errors are:

- a) Errors of omission
- b) Errors of commission
- c) Compensating errors

a) Errors of Omission

When a transaction is either wholly or partially not recorded in the books of

accounts, it is an error of omission. When a transaction is omitted completely, it is called complete error of omission and when a transaction is partly omitted, it is called a partial error of omission. A complete error of omission does not affect the agreement of trial balance whereas partial error of omission may or may not affect the agreement of trial balance. For example, Rs. 100 paid to Ram is neither recorded in the cash book nor in the account of Ram, this error will not affect the agreement of trial balance. Only the total of the trial balance would be short by Rs. 100. But if posting is not done in one of the accounts, this will affect the agreement of trial balance.

b) Errors of Commission

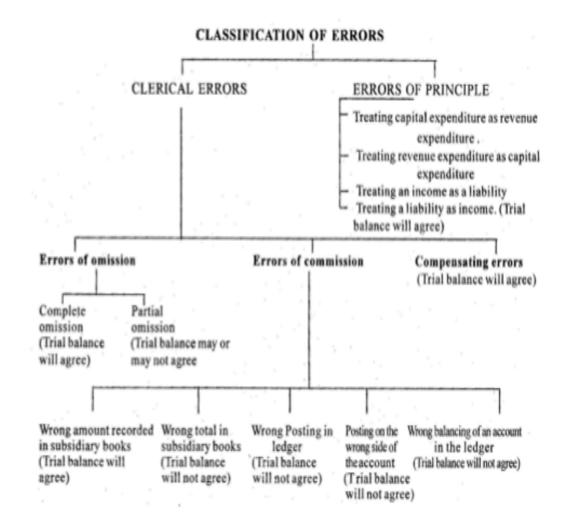

Errors of commission take place when some transactions are incorrectly recorded in the books of accounts. Such errors include errors on account of wrong balancing of an account, wrong posting, wrong totaling, wrong carry forwards, etc. For example, if a sum of Rs. 255 received from Hari is credited to his account as Rs. 525, this is an error of commission. Similarly, if a sum of Rs. 500 paid to Suresh is credited to Sohans account such an error is an error of commission. Some of the errors of commission affect the agreement of trial balance whereas others do not. Errors affecting the agreement of trial balance can be easily revealed by preparing a trial balance.

c) Compensating Errors

These errors, also called self-balancing or equalizing errors, are a group of errors, the total effect of which is not reflected in the trial balance. These errors are of a neutralizing nature. One error is compensated by the other error or by errors of an opposite nature. For example, Amitabhs account is credited with Rs. 500 instead of Rs. 600; Abhijits account credited with Rs. 160 instead of Rs. 100 and Jayas account credited with Rs. 150 instead of Rs. 110. Here the first error of under-credit of Rs. 100 is covered by second and third errors of over- credit of Rs. 60 and Rs. 40 respectively.

Errors of Principle

When a transaction is recorded against the fundamental principles of accounting, it is an error of principle. These errors arise because of the failure to differentiate capital and revenue items i.e. a capital expenditure is taken as a revenue expenditure or vice-versa. Similarly, a capital receipt may have been taken as a revenue receipt or vice-versa. For example, a sum of Rs. 50 paid on the repairs of furniture should be debited to repairs account, but if it is debited to the furniture account, it will be termed as an error of principle. Repair of furniture is revenue expenditure. If it is debited to furniture account, it has been taken as a capital expenditure. Such errors do not affect the agreement of the trial balance because they are correctly recorded so far as the debit or credit side of the wrong class of account is concerned. It would be appreciated that such an error arises through lack of knowledge of principles of accountancy.

LOCATION OF ERRORS

The location of errors of omissions, compensations and principles are slightly difficult because of the fact that such errors do not affect the agreement of trial

balance. However, the locations of some errors of commission are comparatively easier because they affect the agreement of the trial balance. Thus, the errors can be classified into two categories from the point of view of locating them:

Errors, which do not affect the agreement of Trial Balance: As stated, errors of omission, errors of compensating nature and errors of principle do not affect the agreement of the trial balance. Their location is, therefore, a difficult task. These are usually found out when the statements of accounts are sent to the customers or received by the business or during the course of audit and sometimes by chance. For example, if a credit sale of Rs. 2000 to Suresh has not been recorded in the books of accounts, the error will not affect the agreement of the trial balance and therefore, at the time of finalizing the accounts it may not be traced out. However, this will be found out when a statement of account is received from Suresh showing the money payable by him or when a statement of account is sent to Suresh showing the money due from him.

Errors which affect the agreement of Trial balance

The errors, which cause a mismatch in the trial balance totals are frequently referred to as errors disclosed by a trial balance. However, the mismatch does not automatically point out the actual errors. It is only the diligence and ingenuity of the person preparing the accounts, which would help in the location of errors. The procedure to be followed for location of such errors can be put as follows:

i) The totals of the trial balance itself should be thoroughly rechecked in order to find out exact or correct difference.

ii) Make sure that the balances of cash and banks are included.

iii) The difference of the two sides of the trial balance should be found and be divided by two and then find out whether a figure equal to the same (i.e. half the difference) appears in the trial balance. This procedure would enable to locate the amount placed on the wrong side.

iv) If the error remains undetected, divide the exact difference by 9. If it is divisible by 9, this will mean that there may be transposition error or slide error. A transposition error is committed when the digit of an amount is misplaced. For example, machinery account has a balance of Rs. 5689, but it has been written as Rs. 5869 in the trial balance. The resulting error is Rs.

180, which is divisible by 9. A slide error is committed when the decimal point is placed incorrectly. For example, Rs. 3670 is copied as Rs. 36.70. The resulting error is Rs. 3633.30, which is also divisible by 9.

v) See that there is no mistake in balancing of the various accounts.

vi) The schedules of debtors and creditors should be scrutinised so as to find out that all the debtors and creditors have been included in these schedules; their totals are correct.

vii) If the difference is of a substantial amount, compare the figures of trial balance of the current year with the trial balance of the preceding year and see whether there is any abnormal difference between the balances of important accounts of the two trial balances.

viii) The total of subsidiary books should be checked and it should be seen whether posting has been done from these books correctly to respective accounts in the ledger or not.

ix) It should be checked that opening balances have been correctly brought forward in the current years books.

x) If the difference is still not traced, check thoroughly the books of original entry and their posting into the ledger and finally the balancing of various accounts.

xi) If the error still remains undetected, repeat the above steps with the help of other members of the staff, who are not involved in maintaining the books of accounts.

RECTIFICATION OF ERRORS

From the point of view of rectification of errors, these can be divided into two groups:

a) Errors affecting one account only.

b) Errors affecting two or more accounts.

Errors affecting One Account

The following errors affect only one account:

(a) Errors of posting

(b) Carry forward

(c) Balancing

(d) Omission from trial balance

(e) Casting

Such errors should first of all be located and rectified. These are rectified either with the help of journal entry or by giving an explanatory notes in the account concerned and not by simply crossing the wrong amount and inserting the right one.

Errors affecting two or more accounts

The following errors affect two or more accounts:

- (a) Errors of omission
- (b) Posting to wrong account
- (c) Principles

As there errors affect two or more accounts, rectification of such errors is done with the help of a journal entry.

STAGES OF RECTIFICATION OF ERRORS

All types of errors can be rectified at two stages:

i) Before the Preparation of Final Accounts.

ii) After the Preparation of Final Accounts.

Rectification of errors before the preparation of final accounts

If the error is located before the preparation of final accounts, it is either rectified by recording or posting the necessary amount in the respective account or by recording the necessary journal entry to rectify that error. If the error is one sided, it can be rectified by recording or posting the necessary amount in that account. If it is two sided, the necessary journal entry is recorded.

a) Rectification of One-sided errors

These are the errors, which affect one account and will affect the agreement of trial balance. Debiting or crediting the affected account in the ledger rectifies such errors. For example:

i) Purchase Book has been undercast by Rs. 2,000.

The error is only in purchases account. If Rs. 2000 is now posted in the debit side of purchase account as To undercasting of Purchase Book , the error will be rectified.

ii) Amount of Rs. 1000 paid to Hari not debited to his personal account.This error is affecting the personal account of Hari and its debit side is less by Rs.1000 because of omission to post the amount paid. We shall now write on the

debit side of Hari Account as To Cash (omitted to be posted) Rs. 1000 to rectify this error.

iii) Goods sold to Khan wrongly debited in Sales account:

This error is affecting the sales account only as the amount, which should have been posted on the credit side has been wrongly placed on the debit side of the same account. By putting double the amount of transaction on the credit side of sales account by writing By sales to Khan wrongly debited previously, this error shall be rectified.

b) Rectification of two sided errors

As these errors affect two or more accounts, rectification of such errors can often be done with the help of a journal entry. These type of errors do not affect the agreement of trial balance. For example, if furniture purchased has been recorded through purchase book, two accounts viz. purchases account and furniture account are affected. Thus, rectification will be made by taking these two accounts. When such errors are to be rectified, the following procedure should be followed:

1. What has been done? The journal entry, which has been recorded:

INCORRECT ENTRY

Purchase Account - Dr.

To Suppliers Account

2. What should have been done? The correct entry, which was to be recorded: CORRECT ENTRY

Furniture Account - Dr.

To Suppliers Accounts

3. What should now be done? The rectifying entry, which is now to be recorded: RECTIFIED JOURNAL ENTRY

Furniture Account Dr.

To Purchases Account rectification of an error

ILLUSTRATION: An amount of Rs. 4000 paid to R. Ramesha has been credited to the account of S. Ramesha. It is obvious that the credit, placed wrongly to the account of S.Ramesha, should be transferred to the account of R.Ramesha. The correcting entry is:

| | | Rs. | Rs. |
|----------------------|-----|-------|-----|
| S. Ramesha's Account | Dr. | 4,000 | |
| To R.Ramesha's Accou | | 4,000 | |

Rectification of errors after the preparation of final accounts

The rectification of errors after the preparation of final accounts depends upon the nature of error. If an error is a one sided error, it can be corrected by passing a rectifying entry with the help of the Suspense Account and if the error is two sided, it is rectified by passing a rectifying entry in both the affected accounts and such errors are not rectified through Suspense Account.

Suspense account

In case, the accountant is not in a position to locate the difference in the totals of the trial balance and he is in a hurry to close the books of accounts, he may transfer the difference to an account known as Suspense Account. After transferring the difference, the trial balance is totaled and balanced. On locating the errors in the beginning or during the course of next year, suitable accounting entries are passed and the Suspense Account is closed. However, the Suspense Account should be opened only when the accountant has failed to locate the errors in spite of his best efforts. It should not be by way of a normal practice, because the very existence of the Suspense Account creates doubt about the authenticity of the books of accounts.
